

Applied Statistics

Introduction

Denis Derkach, Ali Deeb Khaled, Ehsan Qader

Laboratory for method of big data analysis (Lambda)

LAMBDA • HSE

12 January 2026

Course Overview

Rationale

- ▶ **Applied** Statistics:
 - Methods first;
 - minimal amount of complex calculus (but there are links to resources);
 - special attention to the most frequently encountered problems in methods

Teachers

- ▶ Denis Derkach – lectures (Tuesday 11:00)
 - Associate professor at Big Data and Information Retrieval School
- ▶ Ali Deeb Khaleed – seminars (Tuesday 13:00)
 - PhD student at Bauman Moscow State Technical University
- ▶ Ehsan Qader – assistant (Tuesday 19:40)
 - PhD student at HSE University

Additional consultations: on demand (usually before HW)

<https://www.hse.ru/en/edu/courses/1074724642>

Contents

- ▶ Bayesian and frequentist inference.
- ▶ Analyses of variance and regression.
- ▶ Machine learning statistics.
- ▶ Sampling.
- ▶ Gaussian processes.

<https://www.hse.ru/en/edu/courses/1074724642>

Marking

Formula

$$O_{\text{ИТОГ}} = 4 \times 0,2 * O_{\text{ДЗ}} + 0,1 * O_{\text{КОЛОК}} + 0,1 * O_{\text{ЭКЗ}}$$

- ▶ Homework assignments consist of applied problems and have a two-week deadline. There are no extensions.
- ▶ Bonus points are awarded for Homework:
 - Additional problems in Homework.
 - Answers to the theoretical tests (if any).
- ▶ The colloquium and exam are taken orally using an open-ended set of questions, with no additional preparation time.
- ▶ There are no automated marks in the end of semester.
